The high point is that Luke, the main character, finds another third child like himself hiding. The other third child is a girl at his age who is smarter and more brave then Luke. She always talked how they should be free

**Main Characters**

The main character is Luke (The third child who has been hiding all his life

The other one is the other third child(The third child Luke finds)

**Setting**

The setting is mostly in Luke's house. It's in their kitchen. It is present and it is in the woods. But later on it turns into a farm

**Personal Opinion**

This is one of the best books i read. It was a science fiction (one of my favorite). The best part is in the middle when both of the third child meets. It is sort of boring when they talk too much about the background
